Mr. Bruce McLaren
Science and Discovery Center
114 Pine Street
Suite 201
Corning, NY 14830

Dear Bruce:

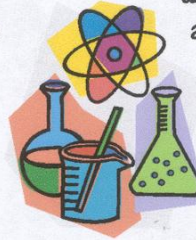

Thank you so much for bringing us the Mobile Science Laboratory. We had an exciting time in the lab and learned many things.

All of the

seventh graders loved seeing the protozoa. They recently wrote essays about protists and many referred to their favorites the mobile science lab and described what they saw. The lab was challenging and appropriate for their level, as well as being very much in line with the NYS standards. Some of the kids still think you might be somehow related to Bill Nye.

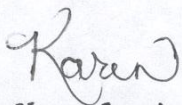

The hydrolysis lab for my eighth graders was a wonderful introduction to chemical change, chemical equations, and energy. The students were quite intrigued by the reactions questions that we will continue to answer as chemistry. My second period class really enjoyed the discussion time you spent with them, even and other physics principles. They call it a "repository of excellence" and can always be counted on to have a million questions and thousands of really are my thinkers and you were terrific with them.

transformations. The students and still have a list of questions we continue in chemistry. We appreciated all the things you taught us about Bernoulli and ourselves the counted on to have creative ideas. They

We really appreciate all that you did for us! Thanks again.

Sincerely,

Karen Jennings
